Payment Modernization Success Stories  
Powered by Ren

Discover how Ren has contributed to three distinct financial institutions in their payment modernization journey

Member of Danareksa

The Largest National Payment Network of Indonesia.

## The Required Innovation

Cross-Border QR Payments • National Bill Payments • Traditional ATM • Merchant Acquiring

## How Did Ren Help?

Ren Payments played a pivotal role in helping Jalin achieve cross-border payments in the merchant ecosystem through the following key contributions:

### Merchant Ecosystem Expansion

Ren Payments helped Jalin expand its merchant network into neighboring countries, such as Thailand and Malaysia. This collaboration streamlined Jalin's merchant acquisition while granting access to advanced digital tools for business growth.

TH  
MY

### National Bill Payments

Ren enabled Jalin to integrate with numerous billers for a comprehensive bill payment experience through a user-friendly 100% API-enabled interface, simplifying bill management and payment for consumers.

### QR Code- Based Wallets

Ren equipped Jalin with the technology and expertise to implement QR code wallet solutions, ensuring compliance with international standards for consumer and merchant convenience.

### Enhances Traditional ATM Network

With Ren's expertise, Jalin upgraded its ATM network, improving user experience across 43,000 ATMs for Indonesia's top four banks through advanced technologies and integrations.

With Ren Payment's expertise and innovative solution, Jalin is achieving its goal of becoming Indonesia's digital payment backbone.

A global bank serving individuals, businesses, and private clients in diverse markets.

## The Required Innovation

A comprehensive solution for card Issuing and ATM services across APAC, designed to support a multi-channel payment infrastructure.

## How Did Ren Help?

Ren delivered robust card management, switching, back-office support, and comprehensive issuing and acquiring services across multiple geographies, in a managed services model for **ten** countries in APAC/ME from its Data Center.

### Payment Hub Solution

Euronet Payment services acted as backbone to support Bank's multi-channel payment infrastructure across geographies.

### Improved customer service

Better control at SCB Group level

### Quick Integration

Ready integration with domestic switches and experience of setting/operating projects across Southeast Asia.

### Cost Effective

Cost savings for SCB and improved customer service.

### Single Platform Support

Standardization achieved due to single platform support.

### Country-wise approach

Quick roll-out of new functionalities to support new geographies.

Ren offered Standard Chartered Bank a comprehensive suite of essential services in the modern, interconnected banking landscape..

## About Ren

Ren drives innovation in banking and financial institutions across payment functionalities. Empowering banks with faster and efficient solutions, unmatched by any other provider.
